'Improve water treatment'

BANGALORE: Water quality expert, Dr Nimish Shah, on Monday said that there is an urgent need for upgrading the 'water treatment devices' and develop the standards of the same. Speaking at the 'Water Quality Association Task Force' meeting, he said, "in terms of risk assessment, there is a need for recognizing non -bacterial pathogen such as viruses and protozoa." Qualitative risk assessment and data about water treatment make it necessary to recognize viruses and protozoa as important goals to be finished in the task.
