Kurukshetra Vol. 57 No. 8 June 2009

CAUSES OF RURAL-URBAN MIGRATION

Traditional rural-urban migration exists in India as villagers seek to improve

as villagers seek to improve opportunities and lifestyler, in 1991, over 39 million people migrated in rural-urban patterns of which 54 million people migrated in systems complicate these population movements. Sessonal urban migraton is also evident throughout India in cities where many migrants move into the city during periods of hardship and return to their orative villages for events such as the harvest.

The rural to urban migration and the urbanization are associated with a vertical shift in the labour force from the agricultural sector to the urbanized-industrial sector. In India migration is from rural agricultural sectors to urban informal sectors as well.

The UN says that if urbanization continues at the present rate, then 46 percent of the total population i.e.d.34 million people will be in urban regions of India by 2030 (UN, 1998), If such an exodes is not checked and corrected; it would lead to extreme urban decay and malice where urban sustainability would then become one big utposit

Large groups of landless, unskilled, illierad labores and polity farmen laver their rulesse and go to distant large towns or cities like Mumbai. Delhi and Lorenzai. They do not go to their neglioring smaller from centres or districts because these regions have already resided first saturation point and fail to form centres or districts because these regions have have already resided first saturation point and fail to The only alternative that is left to the migrants are the range unknown metopolises seen in movies as gliemorous beds of comfort and wealth. Although the realization is biller, their armalications undue stress to the utness system which has to deal with pavements of the utness system which has to deal with pavement.

The urban system breaks down often due to this stross. Water shortage, electricity, transportation, education, housing, security and other services fail. When migration into urban regions continues, ongoing and increasing demands are made on the local economy which is anyways struggling for sustainability.

SOLUTIONS

Over the past four decades, the Government India has adopted many explicit population distribution policies and programs to decongest urban areas an facilitate a more balanced spatial development. The closed city programs were aimed at reduction migration.

to metropolitan regions through such instruments as tax incentives, limitations on investments and

n of squatter settlements. The Governmen also promoted intermediate-size cities and regions by extending suppor services to them, improving thei infrastructure, and strengthening linkages between intermediate-size

> Moreover, land colonization programs were introduced by the Government to re-settle residents from overpopulated rural areas to frontier regions or underutilized areas. The policy instruments commonly

transfer of land titles and the provision of crect and other facilities to increase the productivity an income of settlers. Finally, the Government shoul take effective steps to implement the following Ruri development Programmes to reduce the rural-urba microarise.

- (i) Small Farmers Development Agency/ Marginal Farmers and Agricultural Labourers
- (ii) Hill Area Development Projects.
- (iii) Tribal Development Programmes.
- (iv) Drought Prone Area Programme.
- (v) Rural Landless Employment Guarantee Programme
- (vi) Whole Village Development Programme
- (vii) Integrated Rural Development Programme
- (ix) Training Rural Youth For Self-employment.
- (x) Food for Work Programme
- (xi) And National Rural Employment Guarantee Programme, etc.
